

This paper uses Google search terms containing offensive language as a proxy measure for racial animus. Following the practice of similar works (Stephens-Davidowitz 2014; Chae, Clouston, Hatzenbuehler, et al. 2015; Chae, Clouston, Martz, et al. 2018; Isoya and Yamada 2021), I use coded language to refer to these terms. The words themselves can be found in Table ??

1 Introduction

2 Methods

Large-scale reproducibility surveys of major social science journals often reveal that the original results can’t be replicated (Nuijten et al. 2015; Eubank 2016).

This paper was written using Sweave and Kintr (Xie 2014). The analysis routines were tested using the *testthat* package in R (Wickham 2011) and the *unittest* module in Python (Van Rossum and Drake 2009).
